

HEALTH FIRST

**Heart, kidneys,
dialog, time.
Everything is related.**

Everything affects our health.

Taking a holistic approach, making sure you stay healthy, speaking openly and giving comprehensive advice, providing medical and emotional support – that is what I am committed to and that is my fundamental principle: Health First.

It all begins with a conversation.

Establishing your medical history using state-of-the-art diagnostics, we prevent cardiovascular diseases or identify congenital or acquired risk factors as early as possible in order to develop accompanying measures.

What we can do for you.

To provide the best possible care and support and accompany you on your way to health, we offer:

- ECG, 24-hour ECG and blood-pressure monitoring
- Exercise stress test
- Echocardiogram (ultrasound of the heart)
- Carotid duplex (ultrasound of the carotid arteries)
- Abdominal ultrasound
- Thyroid screenings

Whom we work with.

Health First is a medical practice for internal medicine.

We serve as

- panel practice for BVAEB, SVS and KFA;
- elective physician of the Austrian health insurance fund (ÖGK)
- private medical practitioner.

If required, we cooperate with medical practitioners from different areas of expertise, the AKH and other hospitals in Vienna. As an affiliate doctor (at the Wiener Privatklinik and the Rudolfinerhaus), I offer private patients the opportunity to be treated in hospital.

Health First. And a warm welcome.

Yours, Neda Khalifeh
